

Apple iPad – Data Configuration Guide

A step-by-step guide to configure your Apple iPad for data use with an ekit Micro SIM card.

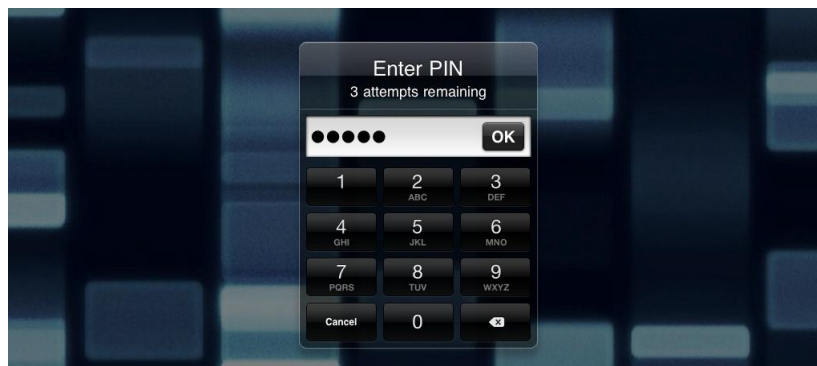

1. You will need your iPad with iOS 4.3 or better installed
2. Install the SIM card in your iPad
3. Follow the instructions below

DATA CONFIGURATION

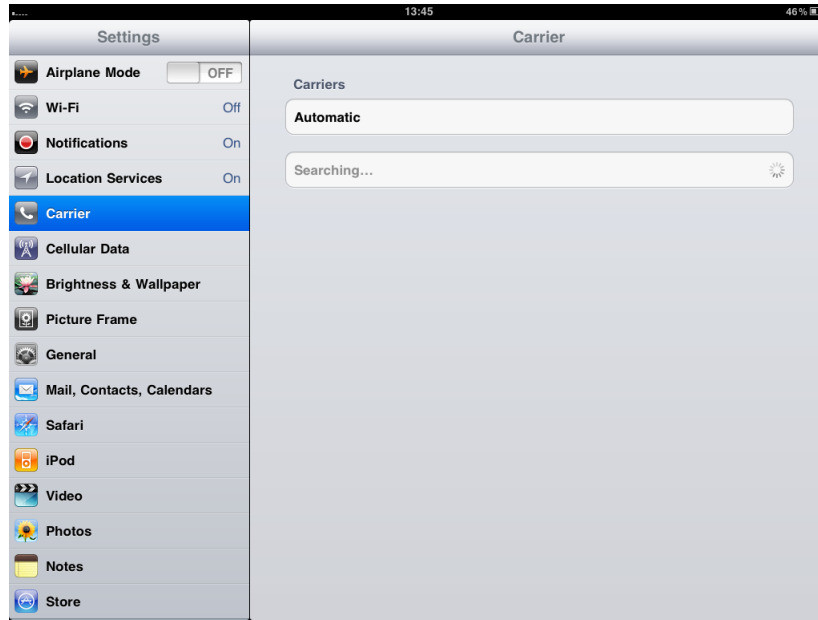

1. Switch off your iPad (press and hold the sleep / wake button)
2. Slide to power off and wait for the iPad to completely shut down
3. Remove the SIM tray, insert the ekit Micro SIM card and slide the tray back into its slot
4. Power up the iPad (press the sleep / wake button)

5. Tap Unlock and enter your PIN

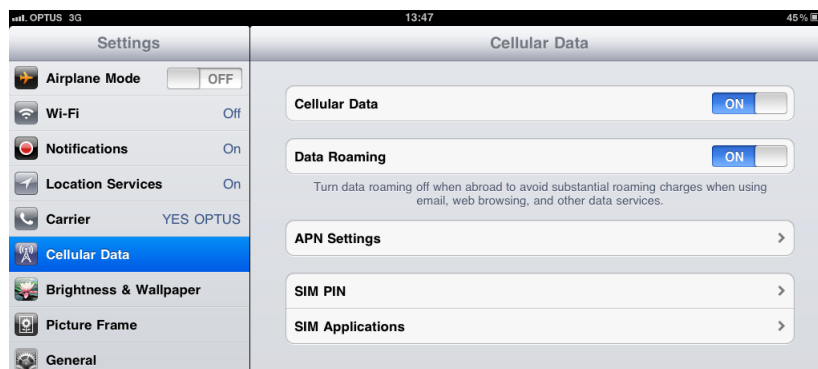

6. On your home screen, tap Settings then Carrier

- Once a list of networks is displayed, select a network and wait for your iPad to connect. Once connected, you should see a similar screen

- Tap Cellular Data and ensure Data Roaming is On

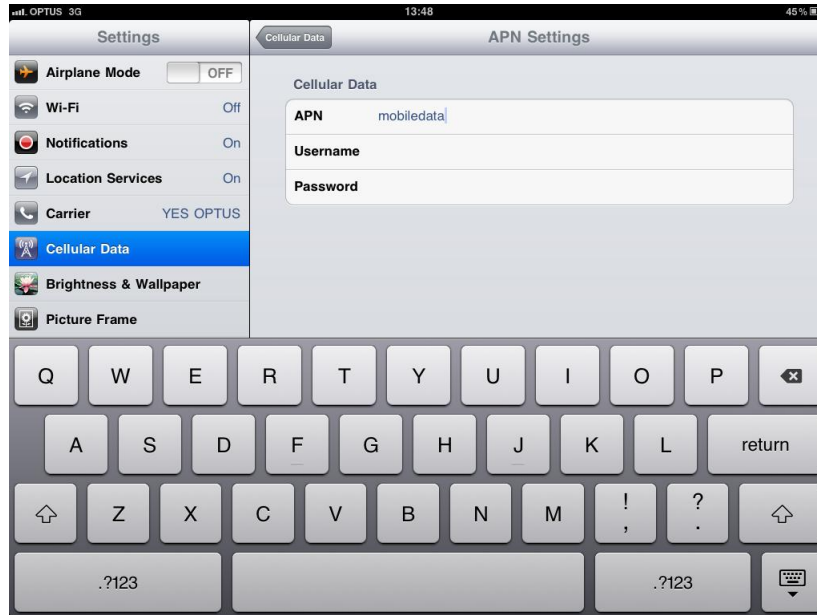

Upon successful connection, you should see either **3G**, **E** or **4**, immediately to the right of the carrier name in the top left corner of your screen

- You are now ready to browse the web or check your email!

TROUBLESHOOTING

If you see  in the top left corner, tap Wi-Fi and set Wi-Fi to Off.

If you do not see any of the above symbols, tap APN Settings and enter mobiledata in the APN field and try again.
